

User Roles — Pet Profiles Module

Owner, Vet Clinic, Admin — PawGuard Platform

1. Important Note on Role Model

PawGuard does not define a standalone “Pet Owner” or “Vet Clinic Staff” database role. Instead, pet-profile access is layered on top of the platform's existing 15 PRR-defined roles plus two record-level relationships (pet ownership, clinic membership). The three groupings below (Owner / Vet Clinic / Admin) describe functional access levels, not literal role names.

2. Owner

Maps to: any authenticated platform user — typically the “donor” or “general_public_user” role.

- Ownership is per-record: companion_pets.owner_id links a pet to exactly one user account
- Permissions: companion_pet:create, companion_pet:read, companion_pet:update, companion_pet:delete, safety_tag:manage, appointment:create/read/cancel, vet_clinic:read
- An owner can only act on pets where owner_id matches their own user ID — enforced at the service layer, not just the UI

3. Vet Clinic

Two-layer access: platform role + clinic membership record.

- Platform role “veterinarian” grants: companion_pet:read/update, companion_pet:medical_upload, vet_clinic:read, appointment:read/manage
- A vet_clinic_memberships row links a specific user to a specific clinic (clinic_id + user_id), with a membership_role field (default “staff”) for finer-grained roles within a clinic
- A vet can only act on pets that have an active pet_clinic_access grant linking that pet to their clinic — they do not see every pet in the system by default

4. Admin

Maps to: super_admin and rescue_centre_admin roles.

- Full read/write across all pets, all clinics, all appointments — no ownership or clinic-membership restriction
- Only these roles hold vet_clinic:manage (create/edit/delete clinic records) and full companion_pet:delete without an ownership check

5. Permission Matrix

Action	Owner	Vet Clinic	Admin
Register a pet	✓ (own)	✗	✓
View pet profile	✓ (own)	✓ (linked pets)	✓ (all)
Update pet profile	✓ (own)	✓ (linked pets)	✓ (all)
Delete pet profile	✓ (own)	✗	✓ (all)
Upload medical record	✗	✓ (linked pets)	✓ (all)
Manage clinic record	✗	✗	✓
Generate safety-tag QR	✓ (own)	✗	✓ (all)
Book / manage appointment	✓ (own pets)	✓ (own clinic)	✓ (all)
