

Module: Finance

pawguard/modules/finance — API prefix: /finance

PawGuard Backend | FastAPI 3.13 + PostgreSQL 17 + Redis/ARQ + S3 | Generated from repo @ commit 99a8430 (2026-08-12)

1. Purpose

Central financial ledger: reconciles donations, expenses, and other income sources into an auditable accounting trail used by the finance summary dashboard.

2. Position in the Layered Architecture

Client → Router (auth+validate) → Service (business logic) → Repository (data access) → PostgreSQL

Like every module in this codebase, business rules live only in the Service layer; Routers authenticate/authorize/validate and Repositories perform data access with no business decisions (see AGENTS.md — the project's engineering constitution).

3. Data Model — Owned Tables

Model Class	Table Name
ChartOfAccounts	chart_of_accounts
GeneralLedgerEntry	general_ledger_entries
FinancialTransaction	financial_transactions
RecurringTransaction	recurring_transactions
Budget	budgets
BudgetItem	budget_items

4. API Endpoints (25 total)

Method	Path	Permission Required
POST	/finance/accounts	finance:create
GET	/finance/accounts	finance:read
GET	/finance/accounts/{account_id}	finance:read
PUT	/finance/accounts/{account_id}	finance:update
DELETE	/finance/accounts/{account_id}	finance:update
POST	/finance/transactions	finance:create
GET	/finance/transactions	finance:read
GET	/finance/transactions/{tx_id}	finance:read
PATCH	/finance/transactions/{tx_id}/status	finance:update
DELETE	/finance/transactions/{tx_id}	finance:update
GET	/finance/summary	finance:read
GET	/finance/pnl	finance:read
GET	/finance/account-balances	finance:read
POST	/finance/reconcile/donations	finance:create
GET	/finance/reconcile/summary	finance:read
POST	/finance/budgets	finance:create
GET	/finance/budgets	finance:read

Method	Path	Permission Required
GET	/finance/budgets/{budget_id}	finance:read
POST	/finance/budgets/{budget_id}/items	finance:update
DELETE	/finance/budgets/{budget_id}	finance:update

+5 additional endpoints not shown — see *openapi.json* for the full list.

Distinct permission codes used: finance:create, finance:read, finance:update

5. Key Service-Layer Operations

- add_budget_item
- bulk_delete_accounts
- bulk_delete_transactions
- create_account
- create_budget
- create_recurring
- create_transaction
- get_account
- get_account_balances
- get_budget
- get_donation_reconciliation_summary
- get_finance_summary
- get_pnl
- get_transaction

+13 additional service methods.

6. Notable Implementation Details

- Acts as the system of record reconciling donation income against recorded expenses.
- Finance summary aggregation was a recent bug-fix target per the latest security-audit commits.
