

Module: Portal

pawguard/modules/portal — API prefix: /portal

PawGuard Backend | FastAPI 3.13 + PostgreSQL 17 + Redis/ARQ + S3 | Generated from repo @ commit 99a8430 (2026-08-12)

1. Purpose

The largest single module (53 endpoints): drives the public-facing website/portal — public content, listings, and public submission endpoints that don't require shelter-staff authentication.

2. Position in the Layered Architecture

Client → Router (auth+validate) → Service (business logic) → Repository (data access) → PostgreSQL

Like every module in this codebase, business rules live only in the Service layer; Routers authenticate/authorize/validate and Repositories perform data access with no business decisions (see AGENTS.md — the project's engineering constitution).

3. Data Model — Owned Tables

Model Class	Table Name
SuccessStory	success_stories
BlogPost	blog_posts
VeterinaryPartner	veterinary_partners
ContactLocation	contact_locations
FAQEntry	faq_entries
CmsPage	cms_pages
CmsSection	cms_sections
CmsContentField	cms_content_fields
CmsPageVersion	cms_page_versions

4. API Endpoints (53 total)

Method	Path	Permission Required
GET	/portal/stats	—
GET	/portal/success-stories	—
GET	/portal/success-stories/{story_id}	—
GET	/portal/blog	—
GET	/portal/blog/slug/{slug}	—
GET	/portal/veterinary-network	—
GET	/portal/contact	—
POST	/portal/contact	—
POST	/portal/newsletter/subscribe	—
GET	/portal/faq	—
GET	/portal/legal	—
GET	/portal/legal/{slug}	—
GET	/portal/urgent-alerts	—
GET	/portal/transparency	—

Method	Path	Permission Required
GET	/portal/me/dashboard	—
POST	/portal/admin/success-stories	system:admin
PUT	/portal/admin/success-stories/{story_id}	system:admin
POST	/portal/admin/blog	system:admin
PUT	/portal/admin/blog/{post_id}	system:admin
POST	/portal/admin/veterinary-network	system:admin

+33 additional endpoints not shown — see `openapi.json` for the full list.

Distinct permission codes used: system:admin

5. Key Service-Layer Operations

- `bulk_delete_blogs`
- `bulk_delete_faqs`
- `bulk_delete_stories`
- `bulk_update_blog_status`
- `bulk_update_faq_status`
- `bulk_update_story_status`
- `create_blog`
- `create_contact`
- `create_faq`
- `create_legal_doc`
- `create_story`
- `create_urgent_alert`
- `create_vet`
- `discard_admin_cms_page`

+41 additional service methods.

6. Notable Implementation Details

- By far the largest API surface (53 endpoints) — mixes authenticated staff endpoints with public, unauthenticated content endpoints.
