

Module: Rescue

[pawguard/modules/rescue](#) — API prefix: `/rescue`, `/public/rescue`

PawGuard Backend | FastAPI 3.13 + PostgreSQL 17 + Redis/ARQ + S3 | Generated from repo @ commit 99a8430 (2026-08-12)

1. Purpose

Rescue-intake workflow: incoming reports, field-operations triage, and dispatch tracking before an animal is formally admitted.

2. Position in the Layered Architecture

Client → Router (auth+validate) → Service (business logic) → Repository (data access) → PostgreSQL

Like every module in this codebase, business rules live only in the Service layer; Routers authenticate/authorize/validate and Repositories perform data access with no business decisions (see AGENTS.md — the project's engineering constitution).

3. Data Model — Owned Tables

Model Class	Table Name
RescueRequest	rescue_requests
RescueDispatch	rescue_dispatches
RescueReport	rescue_reports

4. API Endpoints (20 total)

Method	Path	Permission Required
POST	/rescue/report	rescue:create
POST	/rescue/report	—
POST	/rescue/media-upload-url	—
POST	/rescue/{request_id}/verify	rescue:verify
POST	/rescue/{request_id}/assign-coordinator	rescue:dispatch
POST	/rescue/{request_id}/dispatch	rescue:dispatch
PATCH	/rescue/dispatches/{dispatch_id}	rescue:dispatch
DELETE	/rescue/dispatches/{dispatch_id}	rescue:delete
POST	/rescue/{request_id}/escalate	rescue:update
POST	/rescue/{request_id}/located	rescue:execute
POST	/rescue/{request_id}/secured	rescue:execute
POST	/rescue/{request_id}/admitted	rescue:execute
POST	/rescue/{request_id}/fail	rescue:execute
GET	/rescue/status	—
GET	/rescue/dispatches	rescue:read
GET	/rescue/{request_id}	—
GET	/rescue	—
DELETE	/rescue/{request_id}	rescue:execute
POST	/rescue/bulk/status-update	rescue:execute
POST	/rescue/bulk/delete	rescue:execute

Distinct permission codes used: rescue:create, rescue:verify, rescue:dispatch, rescue:delete, rescue:update, rescue:execute, rescue:read

5. Key Service-Layer Operations

- assign_coordinator
 - bulk_soft_delete
 - bulk_update_status
 - delete_dispatch
 - dispatch_team
 - escalate
 - get_request
 - list_dispatches_paginated
 - list_requests
 - list_requests_paginated
 - lookup_public_status
 - report_incident
 - soft_delete_request
 - update_dispatch
- +2 *additional service methods.*

Auto-extracted from pawguard/modules/rescue/ (models.py, router(s), service.py) at repo commit 99a8430, 2026-08-12.
